GodMode - To enter "GodMode," one need only create a new folder and then rename the folder to the following:
GodMode.{ED7BA470-8E54-465E-825C-99712043E01C}
Once that is done, the folder's icon will change to resemble a control panel and will contain dozens of control options.

February 6th, 2011 Main Meeting Review by John Waller

At 12:45 PM **Alan Raul** conducted his Q & A session.
At 2:30 PM Main Meeting presentation was by **Lauri Sowa** of **Wise Owl Opportunities** www.wiseowlops.com
Lauri Sowa gave us a presentation on Excel 2010. As usual it was an excellent presentation. She discussed several special features of Excel, for example, Double-click the Home tab to hide/reveal the ribbon. Another VERY useful thing she showed us was the Microsoft Interactive Reference Guide, at http://office.microsoft.com/en-us/outlook-help/learn-where-menu-and-toolbar-commands-are-in-office-2010-and-related-products-HA101794130.aspx#_Toc268688374
 This gives you a presentation of the Menu for the   Excel 2003, (and Outlook, Word, etc. as well) You click on the menu selection that you are used to selecting, then it will show you where that option is in Excel 2010. This works for any of the Office 2010 programs. Overall, a very good and informative presentation.
