

# If it's Connected, it needs to be Protected!

Up-to-date information on why and how things that are connected to the Internet need to be secured and protected.

**This presentation will cover: Computers (Windows and Mac), Tablets, Phones and the IoT (Internet of Things).**

Join presenter Bob Gostischa, as he explains the current dangers that face us on a daily basis. He'll also share what he uses to keep his computers, smart devices and other connected things that are a part of the IoT secure.
